12 Sept 2003

MEMORANDUM FOR Record

SUBJECT: Letter of Appreciation

1. I would like to make you organization aware of the fine service that Tim Mulrooney and Rob Maple has provided the Wendell H. Ford Training Center.
2. Mr. Maple first came here in the summer of 2001. During his stay he did everything within his power to make sure that he captured that data that we felt necessary. He worked 14-hour days, with several in pouring rain, to plug all the points on our land navigation course, our road network and building infrastructures. This effort has resulted in an excellent map with all our land navigation points and other critical information being charted.
3. With the addition of Mr. Mulrooney to your staff the excellent customer service, and the standards set by Mr. Maple, continues today. Over the past year I have had many communications with Mr. Mulrooney and he has given us valuable input on our map. Every request that we have made to have data entered on the map has been met with his enthusiasm and willingness to help in making sure that we received a superior product. His attention to detail, willingness to work with the customer and response to our needs has contributed significantly to your office producing a superior product.
4. The efforts and accomplishments of Mr. Maple and Mr. Mulrooney reflect great credit upon each of these fine individuals as well as the GIS Regional Support Center.
